Weather Key Points

Regional Operations Center

Western Region

Tuesday, September 13

- Isolated showers and thunderstorms will linger over mainly the Sierra Tuesday and Wednesday, but with significantly less coverage and fewer impacts than the past few days
 - A few storms could produce locally heavy rainfall along the Nevada border
- Fire weather conditions will remain elevated across much of northern California through midweek, with elevated conditions expanding back into much of southern California for mid and late week as breezy conditions return for the mountains and foothills
 - The strongest winds are expected Tuesday and Wednesday, with gusts up to 35 mph possible, mainly over the Sierra, Modoc Plateau, and coastal ranges of northern California
 - Temperatures will see a continued cooling trend for much of the state into mid and late week, with relative humidity values also rising for many areas outside of southern California
- A cooler pattern with a chance of showers could set up across the northern half of the state over the weekend
